WE HAVE A NEW WEBSITE

We've been working hard developing new materials to help get the message out about pollution from stormwater runoff and what homeowners can do to help.

Our website is one way to view the materials and learn more about what you can do to help reduce pollution.

Visit www.mywatersheds.org to see the new site and easily navigate through it to view updated educational materials.

IT'S CAMPING SEASON – WHERE DO YOU DUMP YOUR WASTE?

We have some new information available about recreational vehicle waste dumping locations in the Tri-County region. You can learn more [here](#).

There are several recreational vehicle dump stations available in our region. It is important to utilize available dump stations as *E.coli* contamination from illegal dumping can be a very serious threat to public health and our land and water resources. The list will help you locate dump stations within Clinton, Eaton and Ingham Counties. You can contact your local Health Department for more information about safely disposing of waste from your recreational vehicle.

Picture Source: www.wccding.org

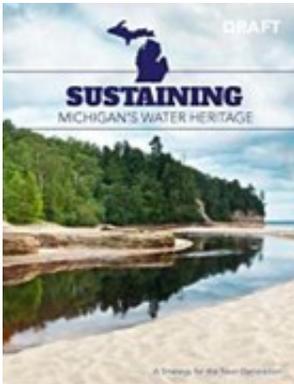

If you see someone dumping at a non-designated area, report it to the Michigan Department of Environmental Quality Pollution Reporting Hotline: 1-800-292-4706.

DRAFT MICHIGAN WATER STRATEGY RELEASED

The Michigan Office of the Great Lakes has released the Draft Water Strategy that provides a roadmap to achieve a 30 year vision to ensure Michigan's water resources support healthy ecosystems, citizens, communities, and economies. The Strategy was developed in collaboration with the Departments of Environmental Quality and Natural Resources, Michigan Department of Agriculture and Rural Development, and Michigan Economic Development Corporation.

The Draft Water Strategy, “**Sustaining Michigan Water Heritage, A Strategy for the Next Generation,**” places Michigan on the path to achieving this vision in a way that builds economic capacity while sustaining the ecological integrity of the resource and ensures that water resources are protected, valued and cared for by present and future generations. It is designed to protect, manage and enhance Michigan's water resources for the benefit of current and future generations.

The Draft Strategy was developed through an extensive engagement process that involved a wide array of individuals, communities, organizations, academia, businesses, industries and tribal and local governments across the state. Hundreds of people provided input through regional, community, and individual conversations, a series of presentations, and describing their desires for the future of Michigan's water resources. The Draft Water Strategy reflects the predominant themes heard throughout the public engagement process in its goals, outcomes and recommendations.

The OGL and its partner agencies will be hosting up to five Water Strategy Community Conversations across Michigan to invite comment and discussion on the Draft Water Strategy. The public is encouraged to attend to learn more about the Draft Water Strategy and discuss opportunities for involvement in implementation. Learn more here: www.michigan.gov/waterstrategy

Comments are due by Friday, August 28, 2015.

Written comments on the Draft Strategy may be submitted to the Office of the Great Lakes, DEQ, P.O. Box 30473-7973, Lansing, Michigan 48909, by fax at 517-335-4053 or by emailing mi-waterstrategy@michigan.gov.
